July 20, 1956

Dear George:

The following is a summary of the discrepancies I find in Amendments No. 8 and No. 9, as forwarded to us. We have signed and returned both, but the discrepancies should probably be corrected in a future amendment.

AMENDMENT NO. 8

Appendix 1, Section A2a should read: "nineteen electronic systems less antennas" since antennas have been called out separately as items b, and c.

Appendix 1, Section A2, cost estimate covered by CMCC Doc. No. 151.602 and enclosure should be \$286,028.

Cost estimate covered by CMCC Doc. No. 151X5.21 should be subtracted from Section A3, rather than A2, since the deletion of these Ampex units and test tapes was from equipment requirement Number 2.

Section G1, cost estimate covered by CMCC Doc. No. 151.705 and enclosure should be \$10,766. Cost of the copies of System One instruction manual should be included in this proposal.

AMENDMENT NO. 9

Section B1c, cost estimate covered by CMCC Doc. No. 1131X5.29 should be \$55,094.

Section B1d, cost estimate covered by CMCC Doc. No. 151X5.157 should be \$12,981.

Page 2 of 2

Section Blf, cost estimate for test chassis covered by CMCC Doc. No. 1131X5.33 should be \$26,303.

Section Cld, cost estimate covered by CMCC Doc. No. 151X5.151 should be \$43,703.

Section H, 2 and 3, wording, while clear to us, may leave some doubt as to what changes, if any, should be made in Section H, 2 and 3, of Amendment No. 8. I assume no change should be made, and that you are only adding the estimated cost.

The draft of Amendment No. 8, which you left with us some time back, is enclosed herewith.

Again, I want to express great appreciation for the improved format of the contract as represented by these two amendments.

Sincerely,

Bob
